

Xiaolong Su

Senior iOS Engineer

Guangzhou, China | +86 15322059092 | 873098673@qq.com

Eligible to work in Hong Kong under a dependant visa; no employer sponsorship required

Available to relocate to Hong Kong after accepting an offer

PROFESSIONAL SUMMARY

Senior iOS engineer with 10 years of experience delivering consumer, smart-device, real-time media, social audio and financial applications. Strong production background in Objective-C, UIKit and complex legacy-system maintenance. Experienced in tracing issues across application, media SDK and device-protocol boundaries, with hands-on work in WebRTC, RTSP, H.264, Metal rendering, playback, recording, device control, automated testing and CI/CD. Previously delivered modules for HSBC's Hong Kong personal banking application, including VIPER-based development, accessibility, localization and test automation.

CORE SKILLS

- **Languages:** Objective-C, Objective-C++, Swift (working knowledge), C
- **iOS:** UIKit, Foundation, AVFoundation, AVAudioSession, Core Data, SQLite, Auto Layout
- **Media and Devices:** WebRTC, RTSP, FFmpeg, Metal, H.264, RTP, MP4 recording, smart-camera control
- **Networking:** URLSession, AFNetworking, SocketRocket, DataChannel, UDP/TCP, device command and response parsing
- **Architecture and Delivery:** VIPER, MVC, MVVM, modularization, CocoaPods, XCFramework integration, Git
- **Quality:** XCTest, UI testing, Instruments, crash analysis, Jenkins CI/CD, code review, device testing

PROFESSIONAL EXPERIENCE

Senior iOS Engineer — Guangzhou Qiangui IoT Technology Co., Ltd.

June 2024 – Present | Guangzhou, China

- Own core iOS development and maintenance for the V720 smart-camera application, covering real-time preview, WebRTC live streaming, device control, SD-card playback, screenshots, recording and file downloads.
- Stabilized live-to-playback transitions across the application and media layers by defining lifecycle and request ownership, gating presentation on the first decoded video frame, and suppressing cancelled or late callbacks.
- Diagnosed an AP-mode protocol crash caused by a G-sensor payload shorter than the three required `int16_t` fields; added a consumer-side length guard and focused regression coverage for 1–5-byte malformed payloads and the valid 6-byte boundary.
- Integrated a static NanoRTSP XCFramework for iOS device and simulator targets, updating public headers, module maps, imports, and Xcode link/embed settings while preserving the application-facing media contract.
- Migrated real-time preview rendering from per-frame `UIImage/UIImageView` updates to Metal-based rendering, reducing main-thread image conversion and rendering work under comparable preview conditions.
- Resolved recording-dimension propagation and download-state ownership issues, preventing unrelated tasks or pages from overwriting active media state.

Senior iOS Engineer — Infosys Limited

May 2021 – May 2024 | Guangzhou, China

- Developed and maintained Contact Details and related modules for HSBC's personal banking iOS application using the team's VIPER architecture and regulated delivery process.
- Implemented configurable phone-number and email validation flows, including region-specific rules, error priority and safe fallback behaviour.
- Delivered Traditional Chinese and English localization, VoiceOver accessibility, dynamic text and multi-environment release support for Hong Kong banking users.
- Added and maintained XCTest and UI test coverage, participated in code review, and supported Jenkins-based continuous integration and regression workflows.
- Integrated Tealium analytics for key user actions in contact-information update flows.

Earlier iOS Engineer Roles

January 2021 – April 2021 — Guangzhou Honglue Information Technology Co., Ltd.

June 2019 – November 2020 — Huobaobao Network Technology Co., Ltd.

November 2017 – April 2019 — Lejiatao Network Technology Co., Ltd.

June 2016 – October 2017 — Guangzhou Jingao Information Technology Co., Ltd.

- Delivered iOS features for B2B ERP, e-commerce, social audio/video and smart-device recycling products, including authentication, payments, local caching, weak-network synchronization, media playback, interaction animation and multi-device adaptation.
- Built reusable UIKit, networking and persistence components and contributed to application maintenance, release delivery, defect investigation and code review.

EDUCATION

Northwestern Polytechnical University

Bachelor's Degree in Computer Science and Technology (part-time), September 2019 – June 2022

LANGUAGES

Cantonese (fluent) | Mandarin Chinese (native) | English (basic working proficiency)
